

DOCUMENT-IDENTIFIER: JP 63211208 A
TITLE: COSMETIC

Sep 2, 1988

FPAR:

CONSTITUTION: The objective cosmetic is produced by compounding (A) 0.01∼3wt.% (preferably 0.05∼1%) phospholipid (e.g. phosphatidylcholine or sphingomyelin) and (B) 0.01∼3% (preferably 0.05∼1%) one or more substances selected from crude extract obtained from peel of Lansium domesticum Jack var. Duke or Lansium domesticum Jack var. Lancer acid and lansioside which are components of the extract and their derivatives. The cosmetic activates the function of dermatic cell and exhibits remarkable effect to protect and beautify the skin. It promotes the permeation of the active component into the skin and has little stickiness.
